

SEO Performance Report

July 2026

- Period: 21 June – 20 July 2026
- 144 Keywords Tracked (Mobile + Desktop)
- 4 Campaigns Monitored
- Prepared 20 Jul 2026

EXECUTIVE SUMMARY

July: Authority Up, Rankings Cooled Off

A mixed month. Domain authority signals moved firmly in the right direction — referring domains, backlinks, organic traffic and organic keywords all grew on Ahrefs — and Modern Vet now shows up in ChatGPT and Perplexity AI responses for the first time. But head-to-head keyword rankings softened across both the mobile and desktop trackers compared to end-June, with Top 3 and Top 10 counts down and several high-volume terms slipping. Net picture: the foundation is getting stronger even though this period's rankings dipped — worth a closer look at what changed on-page or in the SERPs.

EMERGING CHANNEL

AI Search Visibility (GEO)

Modern Vet is now appearing in ChatGPT and Perplexity responses

Ahrefs' new AI Responses index (as of Jul 20, 2026) shows Modern Vet content being surfaced by **ChatGPT** and **Perplexity** for the first time this period, alongside continued presence in **Google AI Mode** (21 responses across 14 pages). This confirms last month's early GEO momentum wasn't a one-off — AI assistants are increasingly citing Modern Vet as a source.

Google AI Mode responses dipped slightly (−3 vs prior period) but still lead the pack. Gemini and Grok show no responses yet — worth keeping an eye on as those platforms mature. Continued authority growth (backlinks, referring domains) is likely helping trigger inclusion across more AI surfaces.

▲ +29 this period

29 in Top 3 (Ahrefs, global)

Note: Ahrefs' organic keyword/traffic figures track modernvet.com globally and differ in methodology from the SE Ranking position trackers above (UAE-only, fixed keyword list) — both data sets point the same direction on authority, but aren't directly comparable keyword-for-keyword.

OUTLOOK

Trend Watch & Next Steps

- **Top 10 / Top 3 counts softened this period** □
Mobile campaign: Top 10 fell from 95 → 88, Top 3 from 39 → 26, and #1 positions from 19 → 9 vs the June 30 snapshot. Average position slipped from 12.1 to 13.3. This is the main thing to investigate — check for SERP layout changes, new competitors, or any recent on-page edits around late June/early July.
- **High-volume "veterinary clinic dubai" dropped out of top 10** ▲
Fell 12 positions to #27 (mobile) and 20 positions to #37 (desktop) — a 1,900-search-volume term worth prioritising for a content/on-page refresh.
- **"animal hospital" and "veterinary hospital" both slipped** ▲
animal hospital: −15 to #24 (mobile); veterinary hospital: −14 to #23 (mobile), −13 to #15 desktop territory. Both are core commercial terms — worth a quick technical/content check on the pages ranking for these.
- **Domain authority is genuinely strengthening** □
Referring domains +62, backlinks +321, organic traffic +237, organic keywords +29 — all up on Ahrefs this period, with Domain Rating holding steady at 53. This is the underlying asset that compounds over time even when short-term rank positions wobble.
- **AI/GEO channel is expanding** □
ChatGPT and Perplexity now surfacing Modern Vet for the first time, on top of continued Google AI Mode visibility (21 responses). No action needed immediately, but this channel is worth watching monthly as it's growing distinctly from classic SEO rankings.

● **Some standout individual gains this period** 📄

"vet clinic" and "veterinary clinic" (2,900 vol each) both jumped into the top 3 (+20 and +18 positions). "the vet clinic" gained +85 positions. "cat vaccinations" gained +59. These show the content/authority work is still landing wins even in a softer overall month.
