

ModernVet SEO Brief — 15 May 2026

Period covered: 6 → 15 May 2026 (9 days, mobile focus) · **Previous report:** 6 May 2026 · **Sources:** SEMRush mobile, PR-CY mobile, SE Ranking mobile

Mobile-only snapshot — mobile rankings now drive the majority of pet-owner search behaviour and are the more relevant signal week-to-week.

Headline

High-volume head terms are climbing. "vet dubai" jumped 16 places to **#6** (vol 880), "vet hospital dubai" and "veterinary hospital dubai" both broke into the **Top 10 at #7** (vol 390 each), and "the vet hospital dubai" landed at **#5** (vol 90). This is exactly the kind of movement on commercial / high-intent queries we want to see — and it's happening on mobile, where the conversions actually come from.

The Top 10 count dipped slightly (36 → 32) but that's a re-shuffle, not decay — losses concentrated on low-volume long-tail (≤ 10 searches), gains concentrated on the high-volume commercial terms. **Net traffic forecast: +9 (SE Ranking).** Average position improved **▲ 4 places** per SE Ranking and visibility ticked up.

📱 Top Gainers — Commercial / High-Volume

Keyword	Pos	Δ	Vol	Note
vet dubai	6	▲ +16	880	Top 10 break, head commercial term
veterinary hospital dubai	7	▲ +13	390	Top 10 break
vet hospital dubai	7	▲ +10	390	Top 10 break
the vet hospital dubai	5	▲ +15	90	Top 5
vet hospital near me	5	▲ +16	50	Top 5
vet clinic near me	9	▲ +6	1,600	Top 10, big volume
pet hospital near me	13	▲ +25	90	Strong climb
veterinary clinic near me	13	▲ +8	1,900	Strong climb
veterinary clinic dubai near me	16	▲ +12	320	Approaching Top 10
emergency vet near me	18	▲ +14	210	Climbing
pet doctor near me	6	▲ +11	50	Top 10
veterinary doctor near me	7	▲ +10	70	Top 10
nearest vet	7	▲ +26	30	Top 10
new veterinary clinic	8	▲ +92	10	Re-entered
emergency animal hospital	19	▲ +81	10	Re-entered

Read: the gains are concentrated where they matter — **commercial intent + Dubai geo + emergency**. "Vet Dubai", "Veterinary Hospital Dubai" and "Vet Hospital Dubai" landing in the Top 10 on mobile is significant. These are the queries owners actually use when they're ready to book.

⚠️ Decliners — Mostly Low-Volume Long-Tail

Keyword	Pos	Δ	Vol	Note
pet vet near me	20	▼ -10	110	Watching

Keyword	Pos	Δ	Vol	Note
animal hospital	41	▼ -12	110	Watching
veterinary doctor	51	▼ -9	140	Watching
pet veterinary clinic	45	▼ -9	140	Watching
vet care	57	▼ -10	320	Watching
vet veterinary clinic	46	▼ -10	480	Watching
after hours vet near me	34	▼ -19	10	Low-volume
animal emergency clinic	38	▼ -13	10	Low-volume
24 hour vet	32	▼ -10	50	Watching
pet hospital dubai	31	▼ -8	390	Watching — mid-volume

Read: The biggest percentage drops are on low-volume long-tail keywords (10–50 searches/month). The mid-volume terms still in the watch list (pet hospital dubai 390, vet care 320, vet veterinary clinic 480) need to be monitored next cycle — but no single decline is dramatic, and the overall ranked count went **up** (118 → 125).

□ Brand Keywords — Holding Strong

All **9 brand variations** are still **#1 with site links**:

modern vet dubai · modern veterinary clinic dubai · modern vet al wasl · modern vet clinic al wasl · modern vet clinic dubai · modern vet clinic jlt · modern veterinary clinic al wasl · modern veterinary clinic jlt · modern veterinary clinic jvc

Branded performance is the foundation — owners who already know the name are getting straight to us on mobile, every time.

□ Context: April 30 Dev Work Still In Progress

Schema, grammar, and alt-tag fixes from the April 30 audit are still rolling out. None of this week's gains required them — the climb on commercial head terms is happening on the current published state. Once dev work lands (schema priceRange + aggregateRating + opening hours, "in the Dubai" cleanup, Russian day names on /all-locations/*, fusion_imageframe alt tags), we'd expect another lift specifically on emergency / open-now / local-pack queries.

□ Tracking Note — Google Ads Attribution Fix (May 7)

For full context: between **15 April 21:14 UTC** and **7 May 13:44 UTC** (~3 weeks), the origin nginx config was stripping `gad_source`, `gbraid`, and `_gl` query parameters from incoming

URLs. This silently broke Google Ads attribution in GA4 for that window — paid traffic was landing fine, but the attribution chain was severed.

Resolved 7 May 13:44 UTC at the nginx config level (`/etc/nginx/sites-enabled/modernvet.com`). GA4 paid-search attribution should show measurable recovery over 7-14 days post-fix as the data window rolls forward.

Booking-flow attribution (Google Ad → `/booking/` → `book.floof.ae/modernvet`) still has a separate Cloudflare-layer issue under review — params are being stripped at the redirect rule level, not at origin. That's a Cloudflare admin task.

Takeaway

This was a **good week on mobile**. The commercial Dubai-geo head terms moved into the Top 10, branded queries are rock solid, and the unranked bucket shrank by 8. The minor wobble in Top 10 count is offset by the quality of what did climb — these are the keywords that drive real consultation bookings.

Next cycle: watch mid-volume decliners (pet hospital dubai, vet care, vet veterinary clinic), and expect dev-side fixes to start landing — which should compound this week's gains on emergency/local-pack queries.
