

Veterinary Services Profile

MULTI-SPECIALTY VETERINARY CARE · DUBAI

VET ALLIANCE HOLDING · UNITED ARAB EMIRATES

About Vet Alliance

Vet Alliance Holding is the UAE's largest veterinary group, operating a network of clinics across Dubai under a single quality and clinical standard. We provide preventive, routine, emergency, surgical and referral-level care for companion animals, working dogs, and institutional patients.

Certifications & Quality

Every clinic in the network is fully licensed by the Dubai Municipality and audited against a unified clinical and infection-control standard. All branches operate on the same medical records system, which means a patient's full history follows them between branches.

Clinical Team

Over 60 veterinarians across the group, supported by RVNs and trained support staff. The team spans more than 30 languages and covers internal medicine, surgery, orthopaedics, cardiology, neurology, ophthalmology, dermatology, oncology, and rehabilitation.

Our Network

A 24/7 multi-specialty hospital, a referral centre (TVRC), and a chain of comprehensive day clinics across Dubai. Sister brands cover exotics, charity/TNR, and pet relocation, giving partners a single point of contact for the full spectrum of veterinary needs.

Operational Reliability

Shared diagnostics, shared records, shared protocols. Cases can move between a branch and the hospital without losing continuity, and complex cases route to the referral centre under one coordinated team. Open every day of the year, including public holidays.

VET ALLIANCE HOLDING

... A Single Partner For Routine, Urgent, And Complex Veterinary Care ...

Why Vet Alliance

For institutional and corporate partners, working with Vet Alliance means one accountable veterinary group covering the full clinical pathway — without referring out of network.

1

Multi-Specialty Network Across Dubai

Six locations covering every major area of the city, plus a 24/7 hospital and a referral centre under one operational umbrella.

2

24/7 Emergency Support

Modern Vet Hospital on Al Wasl Road runs 24 hours a day, every day of the year, with veterinarians and nursing staff on-site overnight. No appointment required for emergencies.

3

Experienced Veterinary Team

60+ vets across general practice, surgery, internal medicine, and specialist disciplines. Surgeons hold international post-graduate qualifications and the team has performed several UAE firsts in cardiac, ophthalmic, and neurological surgery.

4

Advanced Diagnostics & Referral-Level Care

In-house X-ray and ultrasound at every branch. CT and MRI at the hospital and the referral centre. Endoscopy, echocardiography, full in-house lab, and dedicated isolation wards.

5

Strong Coordination Between Branches

One medical records system, one phone line, one WhatsApp. Cases hand off cleanly between a local branch and the hospital without the client repeating the history.

6

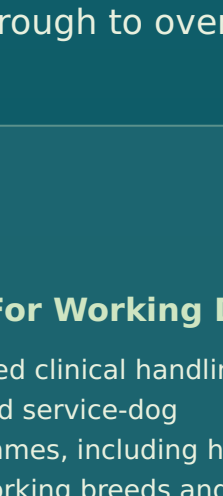

Routine, Urgent, And Complex Cases

From vaccinations and routine checks through to orthopaedic surgery, neurosurgery, and intensive care. The same group handles preventive care and the most complex referral work.

VET ALLIANCE HOLDING

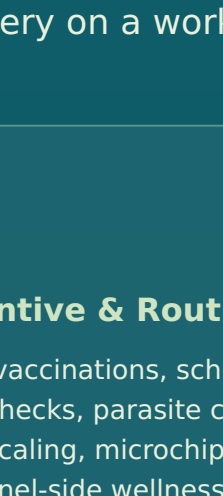

... Highlighted Veterinary Services ...

The services below are available across the network. Routine work is delivered at the local branches; advanced imaging, complex surgery, and intensive care are concentrated at Modern Vet Hospital and TVRC.

24/7 Emergency Care

On-site overnight team, walk-in emergencies, no appointment required at the hospital.

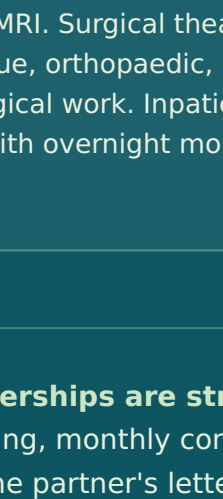

Orthopaedics

Fracture repair, TPLO, joint reconstruction, hip replacement, sports medicine.

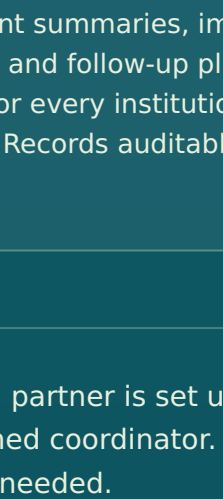

Dental Care

Scaling, polishing, extractions, and dental radiography across all branches.

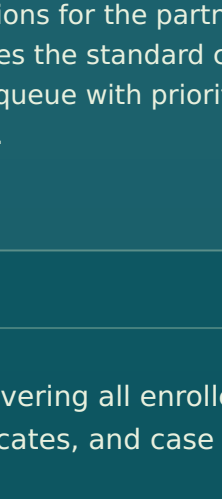

Diagnostic Imaging

X-ray and ultrasound at every branch; CT and MRI at the hospital and TVRC.

Surgery & Hospitalisation

Soft tissue, orthopaedic, neuro and oncologic surgery. Inpatient wards 24/7.

Physiotherapy & Hydrotherapy

Underwater treadmill, rehab programmes, post-surgical recovery and sports conditioning.

Preventive & Routine Care

Vaccinations, parasite control, wellness exams, microchipping, nutrition planning.

Internal Medicine

Endocrinology, gastroenterology, oncology, urology, infectious disease workup.

Specialist Referrals

Cardiology, neurology, ophthalmology, dermatology, oncology — through TVRC.

VET ALLIANCE HOLDING

Government & Institutional Veterinary Services

Vet Alliance supports government, security, and institutional partners that operate working dogs and other service animals. We provide structured, accountable veterinary care backed by the full diagnostic and surgical capability of the group — from a routine vaccine round at a kennel through to overnight emergency surgery on a working dog.

1

Care For Working Dogs

Dedicated clinical handling for K9 units and service-dog programmes, including high-drive working breeds and patients in active deployment.

2

Preventive & Routine

Annual vaccinations, scheduled health checks, parasite control, dental scaling, microchipping, and kennel-side wellness assessments.

3

Emergency & Urgent Care

24/7 walk-in emergency triage at Modern Vet Hospital. Direct line for partner referrals with no booking delays.

4

Diagnostics, Surgery & Hospitalisation

In-house lab, X-ray, ultrasound, CT and MRI. Surgical theatres for soft-tissue, orthopaedic, and neurological work. Inpatient wards with overnight monitoring.

5

Medical Reporting & Case Documentation

Full written case reports, treatment summaries, imaging exports, and follow-up plans issued for every institutional patient. Records auditable on request.

6

Dedicated Coordination

A single named contact handles bookings, follow-ups, and escalations for the partner. Bypasses the standard call-centre queue with priority routing.

How partnerships are structured: Each institutional partner is set up with a master account covering all enrolled animals, agreed pricing, monthly consolidated billing, and a named coordinator. Reports, vaccination certificates, and case files are issued on the partner's letterhead requirements where needed.

... Our Branches Across Dubai ...

Branch Directory

The hospital handles 24/7 emergency and all complex/specialist work. The branches handle daytime consultations, vaccinations, dentistry, soft-tissue surgery, and in-house imaging. All branches share the same medical records system and a single phone number: **800-82** (toll-free in UAE) · WhatsApp **050 630 4573**.
