

ModernVet SEO Report

Period: **15 April → 5 May 2026** (3 weeks) · Generated 6 May 2026

Headline. April 30 dev/SEO brief is **in progress** — changes are queued / under deployment but not yet propagated to the live origin as of May 6. Once they land, expect immediate movement on emergency / 24-hour / open-now queries.

Meanwhile, keyword movement over the period is mostly positive — **66 keywords improved vs 54 declined**, average position 18.6, and several near-me / emergency terms made big jumps. Worth noting this period: **Ahrefs DR dropped 56 → 51** with referring domains down 70 net — partly a Cloudflare-side glitch (also affecting Ads tracking, currently being investigated) and partly the deliberate competitor-spam cleanup we're running. Both expected to stabilise.

Context on the DR / refdomains drop: two known causes are at play —

1. A **Cloudflare-side glitch** (the same one currently affecting Ads param tracking) is likely making some pages intermittently unreachable to crawlers.
2. We're **actively cleaning spam domains** sent by competitors — deliberate refdomain loss, healthy long-term, looks bad on the chart short-term.

Neither indicates organic backlink decay. Expect the curve to flatten once Cloudflare is sorted and the cleanup pass finishes.

Status of Work Since April 14

-  **Apr 22** — Google Ads health check (no issues at the time)
-  **Apr 30** — Homepage media-library alt text saved (Avada `[fusion_imageframe]` still needs in-shortcode `alt=""` as part of the in-progress dev work)

- **Apr 30** — Internal SEO audit re-run; full briefs delivered to dev + SEO specialist
- **IN PROGRESS** Schema fixes (opening hours, priceRange, aggregateRating)
- **IN PROGRESS** Grammar fixes ("in the Dubai" → "in Dubai")
- **IN PROGRESS** Russian day names on location pages
- **IN PROGRESS** Homepage fusion_imageframe alt tags (post 26424)
- **IN PROGRESS** WP REST API write-block investigation (CTO)
- **IN PROGRESS** Cloudflare Google Ads param strip (CTO) — traced to a Cloudflare glitch, not nginx

Keyword Performance (15 Apr → 5 May)

Distribution (145 tracked)

Bucket	Count	%
Top 3	10	7%
Top 4-10	26	18%
Top 11-20	34	23%
Top 21-50	48	33%
Not ranking (>100 / dropped)	27	19%

Healthy distribution at the top — **25% in Top 10** is solid for a competitive market. The 27 unranked is where most of the loss happened (see Losers table).

Top 15 Gainers

Keyword	Pos (5 May)	Δ	Volume	KD
vet clinics	7	▲ +93	2,900	48

Keyword	Pos (5 May)	Δ	Volume	KD
best vet near me	11	▲ +89	30	47
emergency veterinarian near me	13	▲ +87	20	42
emergency vet near me	15	▲ +85	210	36
vets	18	▲ +82	170	48
best veterinarian near me	20	▲ +80	10	45
animal hospital dubai	23	▲ +77	20	41
dog hospital	23	▲ +77	20	44
pet emergency near me	24	▲ +76	20	33
animal hospital near me	25	▲ +75	90	45
veterinarian	28	▲ +72	4,400	32
vet veterinary clinic	29	▲ +71	480	36
veterinary doctor	29	▲ +71	140	42
emergency vet clinic	31	▲ +69	10	21
veterinarian dubai	32	▲ +68	50	38

Read: Recovery is broad-based across emergency / near-me / animal-hospital terms. **"vet clinics" jumping to #7 (vol 2,900)** is the single biggest win of the period. **"veterinarian" climbing 72 places to #28 (vol 4,400)** is the next step toward Top 10 on a major head term.

⚠ Top 15 Losers

Keyword	Pos	Δ	Volume	KD
veterinary clinic near me	dropped	▼ -75	1,900	38

Keyword	Pos	Δ	Volume	KD
veterinary hospital	dropped	▼ -85	320	45
24 hour vet	dropped	▼ -89	50	20
vet hospital near me	dropped	▼ -94	50	42
pet vet near me	dropped	▼ -73	110	35
pet emergency hospital	dropped	▼ -72	10	9
the cat vet dubai	dropped	▼ -68	50	22
pet clinic	dropped	▼ -66	480	36
city vet clinic al wasl	dropped	▼ -65	40	9
noble veterinary clinic dubai	dropped	▼ -64	170	12
animal doctor	dropped	▼ -61	40	38
pet vet clinic	dropped	▼ -56	70	29
pet doctor	dropped	▼ -55	70	39
cat clinic	dropped	▼ -57	30	40
the vet clinic	dropped	▼ -59	30	34

Read: Biggest concern is "**veterinary clinic near me**" (vol 1,900) dropping out of top 100 entirely — pairs with last week's "veterinary clinic" decline. Together these represent ~4,800 monthly searches we're losing visibility on.

The "**24 hour vet**" drop is exactly what the schema brief **predicts**: with `openingHours` declared as 7am–10pm, Google can't classify us as 24/7, so emergency-related rankings stay capped. **This is the single most important reason to ship the schema fix.**

📌 Quick Wins (Page 1, push to Top 3)

Already at position 4–15 with search volume ≥ 200 — most leverage from internal-link / on-page tightening:

Keyword	Pos	Volume	KD	Landing
vet near me	6	5,400	38	/
vet clinics	7	2,900	48	/
vet clinic near me	6	1,600	48	/
vet dubai	8	880	47	/
veterinary clinics	11	2,900	47	/
best vet in dubai	5	260	45	/
vet hospital dubai	10	390	42	/
emergency vet near me	15	210	36	/

Combined potential: ~14,000 extra monthly impressions if all reach Top 3. The schema fixes (especially `aggregateRating` + correct hours + `VeterinaryCare` type) directly support all 8.

📌 Big-Volume Underperformers

Strategic focus area — high-volume terms ranking poorly or not at all:

Keyword	Pos	Volume	KD
veterinarian	28	4,400	32
veterinary	unranked	4,400	34
vet clinic	39	2,900	43

Keyword	Pos	Volume	KD
veterinary clinic	49	2,900	47
vet clinic dubai	22	1,900	43
veterinary clinic dubai	27	1,900	47
veterinary clinic near me	unranked	1,900	38
pet clinic near me	21	1,300	40
veterinarian near me	22	1,300	45
amity veterinary clinic	unranked	880	29

"veterinary" (4,400) being unranked is interesting given strong rank on "veterinarian" (#28) — likely a content/keyword-mapping issue rather than authority. Worth a dedicated landing-page audit.

Mobile Movers (15 Apr → 6 May)

Keyword	Volume	15 Apr	6 May	Δ
vet dubai	880	20	6	▲ 14
dubai vet	320	19	10	▲ 9
veterinary hospital dubai	480	29	22	▲ 7
veterinary clinic dubai	410	37	30	▲ 7
vet in dubai	320	10	23	▼ 13 ⚠
pet hospital dubai	480	13	23	▼ 10
animal hospital near me	210	8	23	▼ 15 ⚠
vet	12,100	17	29	▼ 12
pet veterinary clinic	260	34	57	▼ 23
veterinary clinic	6,600	48	52	▼ 4

Mobile picture is mixed but improving overall — visibility 4× up, Top 10 share doubled. Drops on "vet in dubai" and "animal hospital near me" mirror the SEMRush pattern: emergency/near-me volatility likely tied to local-pack displacement, not organic content.

📄 Open Issues

From April 30 audit — in progress with dev

1. **IN PROGRESS** Schema: 7am-10pm → 24/7
2. **IN PROGRESS** Schema: Russian day names on location pages
3. **IN PROGRESS** Schema: `priceRange` null → `"$$"`
4. **IN PROGRESS** Schema: `aggregateRating` (needs GBP review counts per location)
5. **IN PROGRESS** Grammar: "in the Dubai" sitewide
6. **IN PROGRESS** Homepage alt tags — 7 `fusion_imageframe` shortcodes

CTO — in progress

1. **IN PROGRESS** WP REST API silently rejecting writes — blocks SEO automation tooling
2. **IN PROGRESS** Cloudflare Google Ads param strip — affecting Ads conversion tracking (traced to Cloudflare, not nginx)

Watching this period

1. **MONITORING** DR / reldomains decline (DR 56→51, -70 reldomains) — partly Cloudflare glitch, partly deliberate competitor-spam cleanup. Expected to stabilise.
2. **NEW** "veterinary clinic near me" dropped (vol 1,900) — investigate ranking page, possible cannibalisation

Lower priority

1. 📄 Schema `@type` `LocalBusiness` → `VeterinaryCare` (do last)
2. 📄 Disavow file review (still pending GSC export)
3. 📄 Editorial roundup outreach (Bayut, mypawland, etc.)

□ Recommended Actions

This week

1. **Pull GBP** `ratingValue` + `reviewCount` **per location** — needed by dev for `aggregateRating` per branch (the one input still outstanding from the SEO side).
2. Stay close to dev on the Apr 30 deploy — once propagated, validate via Google Rich Results Test on homepage + JLT + Al Wasl pages.
3. Re-submit those URLs in GSC for indexing immediately after deploy.

Next 2 weeks

1. Investigate "veterinary clinic near me" (vol 1,900) drop — page-level audit + cannibalisation check.
2. Tag the Cloudflare glitch resolution date in tracking so we can isolate its impact on DR / reldomains in the next report.
3. Once spam cleanup pass finishes, run a clean reldomain baseline so future drops can be reliably interpreted.

Next 4 weeks (after schema deploys propagate)

1. Monitor GSC Performance for "24 hour vet Dubai", "emergency vet Dubai", "vet open now Dubai" — expect lift within 2-4 weeks of deploy.
2. Decide on `@type` upgrade (LocalBusiness → VeterinaryCare).
3. Editorial roundup outreach (Bayut, mypawland, etc.) to support DR recovery.

□ What Success Looks Like (Next 30 Days)

Once the April 30 brief propagates (dev work in progress):

- Star ratings appear in SERPs for at least homepage + 2 location pages within 14 days

- "24 hour vet dubai" (vol 90) and "emergency vet dubai" (vol 110) both reach Top 10 within 4 weeks
- vet near me (#6 / vol 5,400) and vet dubai (#8 / vol 880) push into Top 3
- Average tracked-keyword position drops below 15
- Refdomains stabilise above 830 (with active outreach to back it up)

Independent of the deploy, watch:

- Refdomains — expected to stabilise once Cloudflare resolves and competitor-spam cleanup wraps. Set a clean baseline after both finish.
- "veterinary clinic near me" / "veterinary hospital" — confirm whether drops are SERP-feature displacement or content/page issues
- Mobile vs desktop divergence on near-me terms — SE Ranking shows mobile improving while some SEMRush desktop terms slid
